

Painted Stick Monsters

Get crafty with nature during the holidays and create your own monsters! They're a great way to use your imagination and create weird and wonderful creatures!

You'll need...

- Sticks from your garden
- Micador Acrylic Paint
- Micador 3D Paint
- Micador Lotus Palette
- Micador Achiever Brushes

Let's start...

1.

Go for a walk with Mum or Dad and find some sticks with interesting shapes. The weirder, the better! We've painted our sticks with different coloured stripes to create a pattern. Tip: Try mixing different coloured Micador Acrylic Paints together to create new colours.

2.

Use your imagination to add details for your monster. Here we've painted the snap of the stick red so that it looks like the monster's mouth.

3.

Once you've painted your stick monster, use Micador 3D Paint to add the detail. A great way to choose where the monster's eyes should go is to find little knobs on the stick, then use the white 3D Paint for the eyes.

4.

Then use the black 3D Paint for the monster's pupils.

5.

Use other coloured 3D Paint to add spikes and details to your monster!

6.

That's your monster done! Why not make enough to put on a show for Mum and Dad?
