

# Build Your Own Snowman!

IDEA!

Do you want to build a snowman? It's easy with some Micador SuperModelling Clay and twigs from outside!

## You'll need...

- Micador SuperModelling Clay (white, brown, black and orange)
- Twigs from outside

## Let's start...

1.

Using your hands, roll six white balls starting with a big ball, then finishing with two small balls that are the same size (these will be the feet).

2.

Using your fingers, smooth the fourth biggest ball into the second biggest.

3.

Again using your fingers and the appropriate coloured clay, make the snowman's facial features.

4.

Stick these onto his face by lightly pressing down - don't forget his carrot nose!

5.

Press the third biggest ball onto the biggest ball for the body. Then the two smallest underneath for the feet! You can then stick three black buttons onto his body.

6.

Grab some small twigs from outside and stick them into his body for arms, and a couple on top of his head for hair.
